

YOUR NEW ASSISTANT – TEAM-MINDED AND VERSATILE!

These days, finding a good, reliable and discreet assistant is a game of chance unless you opt for our P-3521 MFP or P-3527w MFP A4 black and white multifunctional system. It has minimum space requirements, makes no demands and tackles all its tasks actively and effectively. Printing, copying and scanning take place at lightning speed with the highest level of quality. And if you also need a comprehensive fax function, the P-3527w MFP is just the thing for you! It also offers a Wi-Fi interface and a colour touch panel. So: Put all those applications aside. You've already found your new assistant!

HIGHLIGHTS:

Understandable: A clearly laid out LCD control panel is available on the P-3521 MFP to help you input your jobs. Here, you can save complex, recurring jobs as programs and call them at any time with a simple press of a button. The P-3527w MFP is even more intuitive. It features a colour touch screen that can be individually adapted to the needs and tasks of the respective user. Complex functionality made easy!

Versatile: There are no limits set to productivity at the workplace as both systems can scan up to 40 black and white and 23 colour pages per minute. The systems print at a speed of up to 35 A4 pages per minute and offer the highest quality with a resolution of up to 1,200 x 1,200 dpi. To round off the picture, the systems feature many practical functions such as the automatic Skip blank pages function that filters out blank pages or the ID card copy function that duplicates double-sided, small-format templates on the front side of a single page.

Variable: Mobility is becoming increasingly important in the office. That's why you can also access both MFPs from your mobile end devices via the free Mobile Print app. In addition, the systems also naturally support the Apple AirPrint protocol as well as Google Cloud Print. And, for those who are completely independent, the P-3527w MFP also offers a WiFi interface in addition to the Ethernet port.

Reliable: Good protective measures are needed when working with confidential data. When the 'Private printing' function is used, jobs with confidential content are only triggered on the system once a PIN has been entered. In addition, each user can be assigned their own account via the Management codes function. This creates transparency! However, authentication via a card reader and chip card* is even more practical as then you no longer need to remember your password.
